RE: Material License No. 45-03499-07

Dear Mr. Lamastra:

Following a recent inquiry directed to your office by Charles F. Perdrisat, Chairman, Campus Radiation Safety Committee, on the subject, we were advised that License No. 45-03499-07 which expires on December 31, 1979 and provides for authorization of operation of a 420 curie cesium source, must continue to be a separate license, and cannot be included with the material currently listed under the College's general license.

In order to provide for the renewal of Material License No. 45-03499-07 we enclose the relevant application forms in duplicate as you have directed.

If you have any questions on this matter please feel free to call me.

Sincerely yours,

*Henry Aceto, Jr.*
