Action Compl.	5/7/84

Gentlemen:

We wish to continue our radioisotope program and hereby apply for renewal of our Nuclear Regulatory Commission Materials License #06-11703-02 (expiration date May 31, 1984).

We request the following amendments be made:

1. Deletion of the name of Mr. Rosario Oteri - Mr. Oteri is no longer in the employ of Clairol Incorporated.
2. Addition of two names - Dr. Leszek Wolfram - V.P. Research and Dr. George Serban - Senior Research Chemist. Attached are the resumes of these persons in compliance with Items 16 and 17 of N.R.C. Form 313-I.

It is our understanding that the following practises are acceptable under our license:

1. Synthesis of materials from by-product materials.
2. Transfer of these materials (and/or cosmetic formulae tagged with them) to laboratories licensed by the Nuclear Regulatory Commission to receive radioactive materials and conduct studies of the type required by us.
3. Self-application by the principal investigating scientist of trivial quantities of ^{14}C or ^3H tagged materials. The fate of these is checked through analysis of samples from said investigation (e.g., hair, skin, urine, feces).

If it is required that the above be listed in our license, we ask that these conditions be included in our requested amendments.

Enclosed is a check for \$190 (\$150 for renewal plus \$40 for necessary amendments); this is the license fee required under 10 CFR - 170.31 Category 43 FR 7210-K.

Your consideration of our request for amendment and renewal of Nuclear Regulatory Commission Materials License #06-11703-02 would be appreciated.
