Suite 818
230 Peachtree Street N.W.
Atlanta, Georgia 30303

Dear Mr. Low:

In the last quarter of 1968, and the first half of 1969, we had all radioactive material removed from our plant site. We had no use for this material and the drums in which the material was stored had started to deteriorate.

The material was removed and buried by Nuclear Engineering Company, Inc. of Morehead, Kentucky.

We would appreciate an inspection of our plant site at the convenience of your office. The removal of this material should eliminate our need for a source material license.

Very truly yours,

J. W. Walters
