U. S. Atomic Energy Commission
Isotopes Branch
Division of Material Licensing
Washington, D.C. 20545

Attention: John E. Bowyer

Gentlemen:

I am enclosing a corrected copy of the application for amendment to By-Product Material License No. 50-02430-07 (dated 28 May 1969). The errors were typographical. The maximum dose per animal will be 100 microcuries, not 100 curies.

Please inform us, as early as possible, as to your decision concerning the acceptability of the requested amendment. Our research group was hoping to begin metabolism studies (cesium-134) in the early part of August, 1969. These studies are impossible to accomplish in the late fall and winter in Alaska.

Sincerely,

A handwritten signature in cursive script, reading "J. R. Luick".

J. R. Luick, Ph.D.
