Re: New York City Radioactive Materials  
License Number 91-2895-01

Dear Dr. Mittal:

On August 28, 1996 Mr. Babu Kamble and Mr. Edward Cutler of this Bureau conducted an interview with Donald A. McCord, M.D. to confirm that you received clinical training under his preceptorship at Staten Island University Hospital. Dr. McCord stated that all of your clinical training was received at Seaview Radiology, P.C. The license issued to Seaview Radiology under the name of Patricia Redmond, M.D. only allows radioactive material to be used by an authorized user. Therefore, no supervised work or clinical experience could be obtained under this license.

Your radioactive materials license is rescinded as per our letter to you dated December 11, 1995. You shall within receipt of this letter:

1. dispose of all radioactive material in your possession in accordance with all applicable laws and regulations;
2. submit to this Bureau a written certification of the disposition of all radioactive material using the enclosed form;
3. remove any radioactive contamination to the extent practicable;
4. perform a radiation survey and submit a report of the results to this Bureau; and
5. complete the above activities within ten (10) business days of receipt of this letter.

NYC Radioactive Materials License Number 91-2895-01

Satisfactory completion of these actions is subject to verification by physical inspection of the licensed premises. Failure to comply satisfactorily with these requirements may subject you to civil and/or criminal prosecution, fines, penalties and forfeitures.

If you have any questions concerning how to comply with these requirements please contact Gene Miskin at (718) 643-7994. This action constitutes a final agency determination.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Kathleen Collins', written in dark ink.
