Attn: Mrs. Holt
Materials Licensing Section

SUBJECT: Application for License for
Operating of Nuclear Gauges

Dear Madame:

Kindly refer to the above and our request made to you on Thursday,
June 20, 1985.

The undersigned are engineers deputed for inspection of construction going on at O'Hare. The job at O'Hare is of an urgent nature and tremendous magnitude requiring constant application of nuclear gauges.

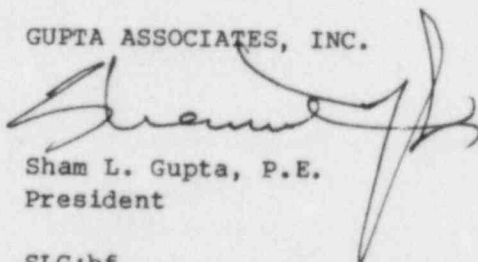

The undersigned firm is for the first time applying for being licensed to handle these nuclear gauges. We already have trained personnel who have attended the necessary safety program and courses to be able to handle the gauges. But the firm does require a license to operate these in the firm's name.

We would appreciate your very kind cooperation in expediting the license procedures so that we could have them at the earliest possible time. Needless to say that the construction work at O'Hare requires nuclear gauges testing procedures to go hand in hand.

Thanking you for your early consideration of this matter,

Very truly yours,

GUPTA ASSOCIATES, INC.
