Gentlemen:

Subject: Reply to Notice of Violation - Docket No. 030-12527  
Inquiry No: 85-01

We have placed the electron capture detector (for the gas chromatograph) which contains (or contained) Nickel 63 in secured storage. It will not be removed from storage until we have received a license for its possession. We have completed and mailed this license application. At such time as we receive the license we will have the condition of the detector assessed and notify you if we determine that it should be disposed of. Steps have been taken to assure knowledge of the detector and the relicensing requirement is made known to the individuals who need to meet these requirements in the future (if they are not the individuals presently responsible for this).

Sincerely,

*Susan Lee Bechtold*
