Docket No. 50-346

Centerior Service Company
ATTN: Mr. Donald Shelton
Vice President
Nuclear - Davis-Besse
c/o Toledo Edison Company
300 Madison Avenue
Toledo, OH 43652

Dear Mr. Shelton:

This refers to the inspection conducted by Messrs. S. Stasek and R. K. Walton of this office on December 16, 1992, through January 25, 1993. The inspection included a review of authorized activities for your Davis-Besse Nuclear Power Station. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

During this inspection, certain of your activities appeared to be in violation of NRC requirements. However, as described in the enclosed inspection report, you identified two of the violations. Therefore, those violations will not be subject to enforcement action because your efforts in identifying and correcting the violations meet the criteria specified in Section VII.B.2 of the "General Statement of Policy and Procedures for NRC Enforcement Actions," (Enforcement Policy, 10 CFR Part 2, Appendix C (1992)). The third violation, although NRC identified, was categorized at Severity Level V and is not being cited because the criteria specified in Section VII.B.1 of the Enforcement Policy were satisfied.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
