Inspection Summary

Inspection on April 8-11, 1985 (Report No. 50-305/85004(DRSS))

Areas Inspected: Included a review of security plan and implementing procedures; management effectiveness; testing and maintenance; compensatory measures; access control - personnel and packages; detection aids - protected area; alarm stations; physical barriers protected and vital areas and followup on noncompliances and unresolved items. Reviewed weaknesses/concerns in the above areas which were identified as a result of a Region III analysis of previous inspection findings, 10 CFR 73.71 security event reports, and the previous SALP report. The inspection involved 52 inspector-hours by two NRC inspectors. The inspection began during a day shift period.

Results: Previously identified concerns/weaknesses were found to have been satisfactorily corrected. Additional concerns were noted in the areas of compensatory measures and access control to vital areas. (Refer to Sections 6 and 8). The licensee was found to be in compliance with NRC requirements within the areas examined during the inspection except for the following item:
