SUBJ: Application for Materials License for Human Medical Usage

Gentlemen:

Charter Hospital Corporation assumed ownership on October 1, 1984 of the facility formerly known as St. Luke's Hospital East at 5535 Delmar Boulevard, St. Louis, Missouri. Prior to the change of ownership, Mr. William Miller, Radiation Safety Technologist for St. Luke's Hospitals, telephoned Patricia Vacherlon of your office to discuss the new nuclear license activities of the Department of Radiology with respect to the change in ownership. Ms. Vacherlon told Mr. Miller that if there were no changes in the licensed users, the Radiation Safety Officer and the radiation safety rules, the Department could continue to operate the Nuclear Medicine facility under the St. Luke's license number 24-01570-03 which is being reviewed by your office for renewal under control number 77392.

The administrative officials of Charter Hospital, Inc. have decided they would like a separate license in the name of Charter Hospital of St. Louis, Inc., and we therefore submit the appended application for a new license. The licensed users will be the same as under the St. Luke's license and as shown in our application. The same radiation safety rules will be followed. The changes will be generally administrative as in the composition of the membership in the Medical Isotopes Committee and the Radiation Safety Committee.

The person who may be contacted concerning our licensed application is Sumner Holtz, M. D., Chief Radiologist, Department of Radiology, Charter Hospital of St. Louis, Inc., 5535 Delmar Boulevard, St. Louis, Missouri 63112, at telephone number 314/361-1212, extension 3580.
