SUBJECT: NRC INSPECTION REPORT 030-32768/93-01

This refers to the routine, unannounced inspection conducted by Mr. R. A. Brown of this office on February 3, 1993. The inspection included a review of activities authorized by Byproduct Material License No. 49-27434-01. At the conclusion of the inspection, the findings were discussed with members of your staff.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, and observation of activities in progress.

No violations or deviations were identified; therefore, no response to this letter is required.

It was noted by the inspector that your activities performing radiography have increased a good deal in the past 6 months. Should this increase in activity increase, it may have an adverse effect on your ability to maintain the detailed records required by the NRC.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact the inspector identified above at (817) 860-8100.

Sincerely,

William L. Fisher, Chief  
Nuclear Materials Licensing Section
