Docket No. 50-213  
B11603

Mr. Edward C. Wenzinger, Chief  
Projects Branch No. 3  
Division of Reactor Projects  
U.S. Nuclear Regulatory Commission  
Region I  
King of Prussia, PA 19406

Gentlemen:

Haddam Neck Plant  
Resident Inspection 50-213/85-07  
NRC Submittals

Your letter of June 14, 1985<sup>(1)</sup> transmitted the findings of the routine NRC inspection of the Haddam Neck Plant on March 7 - May 9, 1985. No violations were identified and no reply to this letter was required.

This transmittal letter discussed a number of measures planned to approve the coordination and technical review of submittals to the NRC. You requested prompt notification if your understanding of our further actions was not correct in any respect. Accordingly, the following clarification is noted.

The June 14, 1985 letter states that Connecticut Yankee Atomic Power Company is making "provision of more time for both site and corporate review of draft submittals." As previously discussed between Paul Swetland and Richard Kacich of my staff, one of our objectives is to provide ample time for both the site and corporate review of draft submittals to NRC. However, we wish to make it clear that we have not recently implemented any specific procedures or processes specifically designed to fulfill this objective. Rather, we believe that our current framework is adequate and we intend to further improve and refine the process via that existing framework. While we have no disagreement with the intent of your letter, we are providing this clarification to insure that no misunderstanding exists.
