Mr. Carl Thorne, Director
Division of Politico-Military
Security Affairs
Office of International Security
Affairs
U.S. Department of Energy
Washington, D.C. 20585

Dear Mr. Thorne:

Enclosed is an application for an export license received recently by NRC from Mitsubishi International Corporation for a reload of low-enriched uranium fuel for use in the Ikata Nuclear Power Plant No. 1 in Japan. A letter of assurance is required that the material will be subject to all of the terms and conditions of an agreement for cooperation. Your assistance in obtaining the necessary assurance letter will be appreciated.

Please note that part of the material involved in the proposed export is of Australian origin which will require appropriate approvals pursuant to the U.S. - Australian Agreement for Peaceful Uses of Nuclear Energy. We are in the process of obtaining additional information about specific quantities of Australian feed material included in the product and will provide this information when received.

Sincerely,

R. Neal Moore, Acting Assistant Director
Export/Import and International Safeguards
Office of International Programs
