Ms. Kathryn Jones
Project Coordinator
Ohio Environmental Protection Agency
Division of Emergency & Remedial Response
Northeast District Office
2110 East Aurora Road
Twinsburg, OH 44067

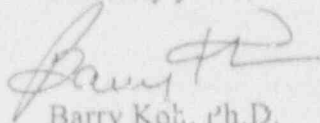

Dear Ms. Jones:

At our recent meeting in Columbus, the OEPA reiterated its requirement that Chemetron obtain the appropriate permits prior to undertaking additional activities at the Bert Avenue site. We are contemplating additional characterization as part of our consideration of alternative remediation plans. Since this characterization will involve excavating portions of the landfill, we are assuming a permit to dig will be required.

Subsequent to our meeting, we reviewed the regulations pertaining to solid waste excavation and the requirements for the permit application. It is not clear from the regulations the level of detail that you require in the application. We would appreciate your assistance in this matter. Please provide us with either a previously submitted application that you consider acceptable, or a model that we can use in preparing our own application. We are eager to begin our efforts at the Bert Avenue landfill and request that you respond as quickly as possible.

If you have any questions, please contact me directly.

Sincerely yours,

Barry Koh, Ph.D.
President
