A. Cesium 137	A. Sealed sources	A. See Item 9.A. not to exceed 2 curies total

## 9. Authorized use

- A. For possession and use in Kay Ray, Accuray, Ohmart, LFE, Berthold Systems, Inc., Data Measurement Corp., Flow Measurement Systems, Ronan Engineering or Texas Nuclear Devices which have been evaluated and approved for licensing purposes and authorized for distribution under a license issued by the Nuclear Regulatory Commission or an Agreement State.

## CONDITIONS

10. Licensed material may be used only at the licensee's facilities at Glen Mills Quarry, Glen Mills, Pennsylvania and at Verdon Quarry, Doswell, Virginia.
11. A. Licensed material shall be used by, or under the supervision of, Jock Fuqua, James Doss, Richard Parton and Michael Dobbs.
- B. The Radiation Safety Officer for this license is Michael Dobbs.
12. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders or detector cells by the licensee.
13. A. Sealed sources and detector cells shall be tested for leakage and/or contamination at intervals not to exceed 6 months or at such other intervals as are specified by the certificate of registration referred to in 10 CFR 32.210, not to exceed 3 years.
- B. Notwithstanding Paragraph A of this Condition, sealed sources designed to emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed 3 months.

- C. In the absence of a certificate from a transferor indicating that a test has been made within six months prior to the transfer, a sealed source or detector cell received from another person shall not be put into use until tested.
- D. Each sealed source fabricated by the licensee shall be inspected and tested for construction defects, leakage, and contamination prior to any use or transfer as a sealed source.
- E. Sealed sources and detector cells need not be leak tested if:
- (i) they contain only hydrogen 3; or
  - (ii) they contain only a radioactive gas; or
  - (iii) the half-life of the isotope is 30 days or less; or
  - (iv) they contain not more than 100 microcuries of beta and/or gamma emitting material or not more than 10 microcuries of alpha emitting material; or
  - (v) they are not designed to emit alpha particles, are in storage, and are not being used. However, when they are removed from storage for use or transfer to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source or detector cell shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
- F. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. Records of leak test results shall be kept in units of microcuries and shall be maintained for inspection by the Commission. If the test reveals the presence of 0.005 microcurie or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission and the source shall be removed from service and decontaminated, repaired, or disposed of in accordance with Commission regulations. The report shall be filed within 5 days of the date the leak test result is known with the U.S. Nuclear Regulatory Commission, Region I, ATTN: Chief, Nuclear Materials Safety Branch, 475 Allendale Road, King of Prussia, Pennsylvania 19406. The report shall specify the source involved, the test results, and corrective action taken.
- G. The licensee is authorized to collect leak test samples for analysis by Ohmart Corporation. Alternatively, tests for leakage and/or contamination may be performed by persons specifically licensed by the Commission or an Agreement State to perform such services.
14. Each gauge shall be tested for the proper operation of the on-off mechanism and indicator, if any, at no longer than six-month intervals or at such longer intervals as specified by the manufacturer, not to exceed 3 years.

15. Installation, initial radiation surveys, relocation, removal from service, or any similar activity with devices containing licensed material shall be performed only by persons specifically licensed by the Commission or an Agreement State to perform such services. The licensee may initially mount the device in accordance with written instructions provided by the manufacturer; however, the device may not be used until surveyed by a person specifically licensed by the Commission or an Agreement State to install gauges. The licensee may repair the electronic equipment not associated with the source or its shielding.
16. Prior to initial use and after installation, relocation, dismantling, alignment, or any other activity involving the source or removal of the shielding, the licensee shall assure that a radiological survey is performed to determine radiation levels around, above, and below the gauge with the shutter open. This survey shall be performed only by persons authorized to perform such services by the Commission or an Agreement State. A record of the results of this survey shall be maintained.
17. The licensee shall conduct a physical inventory every 6 months to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory.
18. The licensee shall not acquire licensed material in a sealed source or in a device that contains a sealed source unless the source or device has been registered with the Nuclear Regulatory Commission under 10 CFR 32.210 or with an Agreement State.
19. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

Dear Mr. Snyder:

This refers to your license amendment request. Enclosed with this letter is the amended license. Please note that as part of this amendment, in accordance with 10 CFR 30.36, effective February 15, 1996, the expiration date of your license has been extended by a period of five years. Your new expiration date is stated in Item 4 of the license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5093 or 5239, so that we can provide appropriate corrections and answers.

Thank you for your cooperation.

Sincerely,

RE: March 15, 1996 Letters  
Name Change Amendments  
Mail Control Nos. 123011 and 123012

Dear Mr. Courtemanche:

We have received your letter dated August 8, 1996, and offer the following answers to your questions:

1. Enclosed are the following documents:
  - a. Articles of Merger-Domestic Business Corporation
  - b. Merger and Name Change of Surviving Corporation of the Merger
  - c. Corporate Chart

Since there was no change in corporate ownership or control, we believe that the "NRC Information Notice 89-25, Rev. 1" is not applicable.

2. As of now, we do not expect our program to expand. The 600 millicurie of CS-137 at our Glen Mills Quarry and the 1350 millicurie of CS-137 at the Verdon Quarry is sufficient.
3. Both licenses are to have the following mailing address:

4. There has not been a change of gauge storage location. The State changed the name of Gravel Branch Road to Keystone Road. As I understand it, this change had something to do with the institution of the 911 Emergency System.

Should you have any questions, Mr. Courtemanche, please call.

Thank you.

Easton, PA 18044-0231

Dear Mr. Snyder:

This is in reference to your March 15, 1996 letters from General Crushed Stone, Co. and HRI, Inc. requesting amendments to the above referenced NRC licenses. In order to continue our review, we need the following additional information:

1. We note that both General Crushed Stone Co. and HRI, Inc. are changing their names to Milestone Materials, Inc. Enclosed is Information Notice 89-25, Revision 1, for your use in providing us with the information needed to process your amendment request. Since the two companies appear to be affiliated, a complete description of their corporate structures, including their parent company, will be required. For those questions in Attachment 1 that do not apply, you may simply state that they are not applicable.
2. Item 8.A. of the General Crushed Stone Co. license does not contain a possession limit. Please review your program and inform us of your current needs. You may request a higher possession limit than your current inventory if you believe that your program may expand.
3. Please confirm whether both licenses are to have a mailing address of P. O. Box 231, Easton, PA 18044-0231.
4. Item 10 of the HRI, Inc. license and your March 15, 1996 letter contain a discrepancy. The license has a location of storage as "Gravel Branch Road, Lake Ariel, Pennsylvania" while your letter states that the place of storage is "Keystone Road, Lake Ariel, Pennsylvania." If the above is a change in the place of storage, then review your leak test records for the gauges stored there to determine if there were any leaking sources. Also, provide a facility diagram of the new place of storage indicating where the gauges are stored and your assessment of the radiation doses received by the individual in the nearest occupied area.

V. Snyder  
HRI, Inc. and General Crushed Stone Co.

We will continue our review upon receipt of this information. Please reply in duplicate to my attention at the Region I Office and refer to Mail Control Nos. 123011 and 123012. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5075.

If we do not receive a reply from you within 30 calendar days from the date of this letter, we shall assume that you do not wish to pursue your application.

Sincerely,
