PRAIRIE ISLAND NUCLEAR GENERATING PLANT  
Docket Nos. 50-282 License Nos. DPR-42  
50-306 DPR-60

Withdrawal of Letter Dated January 30, 1992  
Addition of Boric Acid Tank to Relief Request No. 45

Reference: Letter from Thomas M Parker, Northern States Power Company, to U S Nuclear Regulatory Commission dated January 30, 1992, titled "Revised Relief Request No. 45 Second Ten-Year Inservice Interval"

In the referenced letter, we requested the addition of the boric acid tanks to the Prairie Island Inservice Inspection Program Relief Request No. 45. Relief Request No. 45 was submitted with the original Prairie Island Inservice Inspection and Testing Program Second Ten Year Interval on December 22, 1983. The NRC approved the Second Ten Year Inservice Inspection and Testing Program (including Relief Request No. 45) on December 28, 1984. Through further review of Section XI of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code, we have determined that relief is unnecessary. We, therefore, withdraw our letter of January 30, 1992.

We apologize for any inconvenience this may have caused.

This letter contains no new NRC commitments. Please contact Jack Leveille (612-388-1121, Ext. 4662) if you have any questions related to this letter.
