Florida Power Corporation
ATTN: Mr. W. S. Wilgus
Vice President Nuclear Operations
P. O. Box 14042, M.A.C. H-2
St. Petersburg, FL 33733

Gentlemen:

SUBJECT: REPORT NO. 50-302/85-22

On April 29 - May 1, 1985, NRC inspected activities authorized by NRC Operating License No. DPR-72 for your Crystal River facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

Your attention is invited to an unresolved item identified in the inspection report. These matters will be pursued during future inspections.

Our Confirmation of Action letter dated January 29, 1985, to Florida Power Corporation (FPC) documented FPC's commitment to recertify the operator and senior operator candidates who were examined by the NRC in December 1984 and successfully passed their examination. By letter of April 4, 1985, FPC stated to the NRC that the recertification was complete and that the resulting documentation was available for review. This inspection report contains the results of our review of the recertification documentation. As a result of our inspection, we found your recertification process to be inadequate in that the training records do not indicate that the candidates successfully completed all of the required training. We are concerned that your management control system permitted these occurrences. Consequently, we request that you reply to this letter to explain how this occurred and describe in particular those actions taken or planned to prevent recurrence.
