WILLIAM G. COUNSIL
EXECUTIVE VICE PRESIDENT

Director of Nuclear Reactor Regulation
Attention: Mr. Vincent S. Noonan, Director
Comanche Peak Project
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION
DOCKET NOS. 50-445 AND 50-446
CLARIFICATION TO TEXAS UTILITIES LETTER TXX-4426

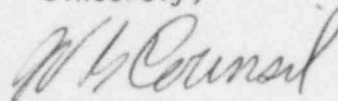

Dear Mr. Noonan:

TXX-4426 dated March 19, 1985 requested a partial exemption from General Design Criterion 4 of 10CFR50 for CPSES Unit 2 from the requirement for protection of structures, systems and components from the dynamic effects associated with eight postulated primary loop breaks.

In accordance with recent discussions between our staffs, this letter provides further clarification in that granting of the requested exemption will not affect the design bases for the reinforced concrete walls of the Reactor Cavity or the primary loop component compartments.

We remain available to provide any information necessary to implement this request promptly.

Sincerely,

W. G. Council
