

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION IV

811 RYAN PLAZA DRIVE, SUITE 400
ARLINGTON, TEXAS 76011-8064

Docket: 030-03495
License: 49-00152-02

Wyoming Medical Center
ATTN: Lin L. Carriger, President
1233 East Second Street
Casper, Wyoming 82601

SUBJECT: NRC INSPECTION REPORT 030-03495/93-01 (NOTICE OF VIOLATION)

This refers to the routine, unannounced inspection conducted by Messrs. Gilbert L. Guerra, Jr. and Charles L. Cain of this office on February 2-3 1993. The inspection included a review of activities authorized by Byproduct Material License No. 49-00152-02. At the conclusion of the inspection, the findings were discussed with members of your staff.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observation of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). These violations related to your radiation committee meeting procedures and dose calibrator tests.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

Two additional violations were not cited in accordance with NRC's Enforcement Policy (10 CFR Part 2, Appendix C) Section VII, "Exercise of Discretion." One of these was identified by the licensee and related to posting the brachytherapy source storage room as "caution radiation" instead of "caution radioactive materials" (10 CFR 20.203(e)(1)). Another violation, identified by the inspectors, related to the failure to retain records of annual refresher training for 1991 for individuals working in or frequenting restricted areas (License Condition 15). These violations are not being cited because corrective action had been taken by the licensee by the time the inspection ended.

JE07/1

Also reviewed were the actions you had taken with respect to the violations observed during our previous inspection conducted on February 25-26, 1991. The inspection verified that the corrective actions for these violations had been implemented as stated in your reply dated March 27, 1991, and that these actions were effective.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

The responses directed by this letter and the enclosed Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96.511.

Should you have any questions concerning this letter, please contact the inspectors identified above at (817) 860-8100.

Sincerely,

for L. J. Callan, Director
Division of Radiation Safety
and Safeguards
