ATTN: Ross P. Barkhurst, Vice President
Operations, Waterford
P.O. Box B
Killona, Louisiana 70066

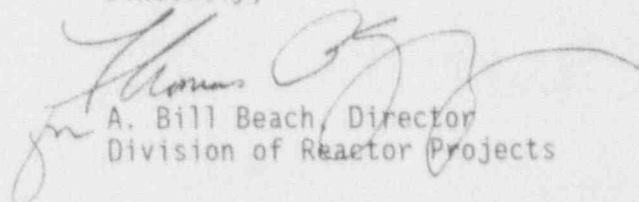

This refers to the meeting conducted at Mr. Dan Packer's request in the Region IV office on February 9, 1993. This meeting related to your recently completed refueling outage, shutdown risk considerations, communications with the NRC, milestones for 1993, and the new corrective action program. The meeting was open to public observation and was attended by those on the attached Attendance List.

The subjects discussed at this meeting are described in the enclosed Meeting Summary. It is our opinion that this meeting was beneficial and has provided a better understanding of your performance and plans in the areas discussed.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the NRC's Public Document Room.

Should you have any questions concerning this matter, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects

MEETING SUMMARY

Licensee: Entergy Operations, Inc.
Facility: Waterford 3
License No.: NPF-38
Docket No.: 50-382
Subjects: Recent Refueling Outage
Shutdown Risk Considerations
Communications with the NRC
New Corrective Action Program
Milestones for 1993

The fifth refueling outage completed in November 1992 was discussed, including major work items, difficulties, and accomplishments. Outage risk management during the refueling outage was discussed, including its benefits, lessons learned, and future planned improvements. Discussions of communications between Entergy and the NRC included an assessment of working level communications with resident and regional inspectors, management interfaces, and plans to enhance communications. Entergy representatives presented an overview of the revised corrective action program, which was implemented on February 1, 1993. Under this program, most corrective action items are reported using one form, the Condition Report. This revised program was developed based on Quality Action Team recommendations. Discussion of milestones for 1993 included completion of the generation support building, planned initiation of construction of a new maintenance support building, and plans for the sixth refueling outage scheduled for March 1994.
