

NOTICE OF VIOLATION

Park Medical Center
Columbus, Ohio

Docket No: 030-08207
License No: 34-02121-02

During an NRC inspection on August 9, 1996 with continuing NRC review through September 10, 1996, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedures for NRC Enforcement Actions," NUREG-1600 (60 FR 34381, dated June 30, 1995), the violation is listed below:

Condition No. 14(a) of License No. 34-02121-02 requires that the licensee conduct its program in accordance with the statements, representations and procedures in an application dated February 28, 1994. One of the procedures in the application dated February 28, 1994 states that the licensee will implement the model procedure for surveys which was published in Regulatory Guide 10.8, Appendix N. This regulatory Guide requires that the licensee keep records of measured dose rates in mR/hour or contamination levels in dpm/100 cm², as appropriate.

Contrary to the above, the licensee failed to maintain records of actual weekly contamination levels in units of dpm/100 cm². Specifically, the licensee was performing the evaluation of the wipe tests using erroneous default values entered into the Mallinckrodt computer system (which computes/calculates the threshold value and reports the value if the pre-established threshold is exceeded, in this case 2,000 dpm/100 cm² (restricted)).

This is a Severity Level IV violation, Supplement VI.

Pursuant to the provisions of 10 CFR 2.201, Park Medical Center is hereby required to submit a written statement or explanation to the U. S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D. C. 20555, with a copy to the Regional Administrator, Region III, 801 Warrenville, Rd, Lisle, Illinois 60532-4351 within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because your response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if you find it necessary to include such information, you should clearly indicate the specific information that you desire not to be placed in the PDR, and provide the legal basis to support your request for withholding the information from the public.

Dated at Lisle, Illinois
this 10th day of October 1996
