BRANCH

NRC STAFF NOTICE OF ISSUANCE OF AMENDMENT
OF ORDER AND MOTION TO CONFORM PROPOSED
TECHNICAL SPECIFICATIONS IN ACCORDANCE THEREWITH

The Director, Officer of Nuclear Reactor Regulation (Director) has issued the attached Amendment of Order, dated July 8, 1985, pursuant to his authority under 10 C.F.R. § 2.717(b). This amendment will modify the license requirements imposed by an Order of the Director dated February 11, 1980, by modifying the proposed Technical Specifications by adding certain exceptions to the two valve isolation requirements of the proposed Technical Specifications. These matters are reflected in modifications to Section 1.7 of the proposed Technical Specifications and a new Table 3.6-2 which lists exceptions to containment penetration valve configurations. This Amendment of Order will be effective on August 12, 1985. In Table 3.6-2 the penetrations designated R-537 and R-577 should be designated as R-573 and R-557 respectively. A correction to the enclosed Amendment of Order will be sent to the Board when issued.

The Staff's Safety Evaluation Report and revised proposed Technical Specifications are also attached.

DS07

Pursuant to an Order of the Commission, dated May 12, 1980, this Licensing Board has been designated to conduct the proceeding with respect to the proposed formal license amendment incorporating the Technical Specifications proposed in the February 11, 1980 Order. In order to conform the proposed Technical Specifications with the actions taken by the Director in the attached Amendment of Order, the NRC staff hereby moves that the proposed Technical Specifications be formally modified to conform to the Amendment of Order subject to the authority which 10 C.F.R. § 2.717(b) explicitly preserves in the presiding officer for purposes of this proceeding. Formal amendment of the license will, of course, await the outcome of the prospective hearing.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "W. D. Paton".
