SUBJECT: INSPECTION NO. 9990001/96-008

Dear Mr. Lucksinger:

On August 27, 1996, Penny Lanzisera of this office conducted a safety inspection at the above location of activities authorized by the above listed NRC license. The inspection was an examination of your licensed activities as they relate to radiation safety and to compliance with the Commission's regulations. The inspection was limited to a review of the events surrounding the loss of a static eliminator contained as licensed material. The findings of the inspection were discussed with you, at the conclusion of the inspection, and are documented in the enclosed inspection report. This also refers to your correspondence dated September 20, 1996, in which you stated that the previously reported missing static eliminator air gun was located.

Within the scope of this inspection, no violations were identified.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room. No reply to this letter is required.

Your cooperation with us is appreciated.

Sincerely,
