

October 8, 1996

Mr. Wilfred Connell, Vice President  
Clinton Power Station  
Illinois Power Company  
Mail Code V-275  
P. O. Box 678  
Clinton, IL 61727

SUBJECT: NRC INSPECTION REPORT NO. 50-461/96008(DRS)

Dear Mr. Connell:

This refers to the inspections conducted by Mr. M. Holmberg of this office on August 26 through 30, 1996, of activities authorized for Clinton Power Station. The focus of this inspection was your inservice inspection efforts. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspections are identified in the report. Within these areas, the inspections consisted of selective examinations of procedures, representative records and interviews with personnel.

The inspector considered the inclusion of small bore piping into your Flow-Accelerated Corrosion (FAC) program and the use of automated ultrasonic equipment to perform examinations for your Inservice Inspection program to demonstrate commitment to a quality program.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

W. Connell

-2-

We will gladly discuss any questions you have concerning these inspections.

Sincerely,

Original signed by Brent Clayton for

Geoffrey E. Grant, Director  
Division of Reactor Safety
