MEMORANDUM FOR: Members and Staff of the American
Physical Society Study Group

FROM: Christopher P. Ryder
Accident Source Term Program Office
Office of Nuclear Regulatory Research

SUBJECT: SEVERE ACCIDENT SOURCE TERM REASSESSMENT

Enclosed is a directory to the documents on the Severe Accident Source Term Reassessment. The directory indicates where information, by subject, is located.

Also enclosed is a list of the documents on background information. These documents were sent to Dr. Kamal Araj to be distributed as appropriate for the needs of the Study Group.

The IDCOR reports listed in the matrix were also sent to Dr. Araj. As of November 17, 1983, only the reports having background information (accident sequences, hydrogen, and core melt phenomenology) are available. The reports dealing directly with the source term phenomena (fission product release and transport) will be sent to Dr. Araj when they are received by the NRC.

If you have any questions, please contact me at (301) 427-4337.
