

11/15/83

Cecil Thomas,

DSI cannot concur in the recommended schedule for GESSAR II provided by your concurrence sheet of 11/4/83. Our reasons are as follows:

- ① DST work at BN2 to review the external events PRA has slipped & we are dependent upon that work to complete our own
- ② ASTPO work has reportedly slipped from 12/31/83 to 1/31/84 and we are similarly dependent upon that work
- ③ second sentence of page 2 is in error. The agreement with GE was to redo the PRA and SER if APS peer review results in Nov 84 change the source term of 1/31/84 (and the APS review most likely will result in changes).
