License No. 21-20455-01

Gentlemen:

This refers to the routine safety inspection conducted by Ms. T. L. Simmons of this office on May 1, 1985, of activities authorized by NRC Byproduct Material License No. 21-20455-01 and to the discussion of our findings with you by telephone on May 8, 1985 and Mr. B. Patel at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as specified in the enclosed Appendix A. A written response is required.

In addition to our concern for corrective action with respect to the specific items of noncompliance noted, we are concerned about your management control system that has permitted these items to occur. Consequently, in your reply to this letter, please describe those actions taken or planned to improve the effectiveness of your management control over your licensed activities so as to preclude the recurrence of these or similar items of noncompliance. Enclosed is Appendix B, "Management Control" to provide you with some guidance for your response.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
