ATTN: DOCUMENT CONTROL DESK

RE: "REPLY TO A NOTICE OF VIOLATION"
INSPECTION NO. 030-34013/96-001
LICENSE NO. 37-30264-01

During the NRC inspection conducted on August 5, 1996, our gauge, Troxler Model 3440 Surface Moisture Density Gauge, was not found in the locked room of our Materials Testing Laboratory. At the time we were preparing to move our offices to the new location of our Testing Laboratory. The gauge was placed in the hallway outside the Testing Laboratory temporarily to move supplies and equipment into the Testing Laboratory. The building was unoccupied and locked at the time of this inspection.

On August 5, 1996, on the same day as this inspection and before notification of this violation, the gauge was placed in the locked room inside our Testing Laboratory and has remained there since.

We are in full compliance of License Condition 19 of NRC License No. 37-30264-01.

If you require any additional information, please do not hesitate to contact this office at (814) 536-5490.

Sincerely,

INSPECTION ENGINEERS, INC.
