Docket No. 50-346
License No. NPF-3
Serial No. 1142
May 28, 1985

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Licensing
United States Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed changes involve Sections 3.8.1.1 and 4.8.1.1.2.

The attachment identifies the changes, safety evaluation and significant hazards considerations. The proposed changes concern reducing the number of cold fast starts for emergency diesel generators and the surveillance testing of the synchronization with offsite power source. These concerns were identified in NRC Generic Letter 84-16 dated October 5, 1984 (Log No. 1546) and incorporated herein.

Enclosed is a check for \$150 as required by 10CFR170.12(C) for license application.

Very truly yours,

Attachment
