Trojan Nuclear Plant  
Docket 50-344  
License NPF-1

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

Dear Sirs:

Preclusion of Fuel Movement into Containment

By letter dated January 27, 1993, Portland General Electric (PGE) submitted License Change Application (LCA) 229, requesting modification of the Trojan operating license to a "Possession Only License". LCA 229 removes on a permanent basis PGE's authorization to operate Trojan as a nuclear generating station.

Additionally, by letter dated February 2, 1993, PGE certified to the Nuclear Regulatory Commission (NRC) that the fuel had been permanently removed from the reactor vessel at Trojan and had been placed in the spent fuel pool, thus placing the unit in a permanently shutdown and defueled condition.

This letter certifies that PGE will not move fuel back into the containment building at Trojan without prior NRC approval.

Sincerely,

R. D. Machon  
for J. E. Cross

220115

c: Mr. John B. Martin  
Regional Administrator, Region V
