Attn: Charles Flynn

Dear Mr. Flynn:

United Cold Storage Specialties, Inc. is the owner of a Campbell Pacific Nuclear Hydrotector NC-1 (Serial Number H31983978). We bought this machine on November 2, 1981, at that time Mr. Tom Frankovich was employed by our company and he had a liscense to operate this machine. Mr. Frankovich no longer works for our company but he still has the liscence for this machine in his name. We would like to have this liscence transfered our a new liscence issued to our firm. We do not and do not intend to use this machine we are only storing it until we can find a buyer. At this time the machine hangs from the rafters in our warehouse. Enclosed please find a sketch of our warehouse showing where this machine is located. If any further information is required please let me know.

Very truly yours,

Lisa A. Mummert
