Gentlemen:

We have reviewed your amendment request dated November 12, 1984 regarding the addition of Dr. Marc Thomas, M.D. to your license as an authorized user and find that we will need the following:

Please submit documentation indicating that Dr. Thomas is licensed to practice medicine in one of the States or Territory of the United States.

Dr. Thomas' preceptor statement has a confusing notation on Supplement B. The box that lists the generator elutions is circled with a question mark. Please explain what this means (copy enclosed). The question that comes up is whether Dr. Lull is disputing the number of elutions Dr. Thomas has listed in his preceptor statement.

Sincerely,
