

Dear Friends:-

June 19, 1985. 50.352/355

When I see the Delaware River with its  
copious supply of water, and I see the need  
for water in Suxmont today, I am constrained  
to thank God for the plans of our county  
officials to meet our needs at it. Pleasant  
and the water diversion project.

Ninety-three million gallons of water  
every day will meet our needs, and the need  
of our Utility, the Philadelphia Electric  
Company.

We need to finish this project at once!
