Houston Lighting & Power Company  
ATTN: J. H. Goldberg, Group Vice  
President  
P. O. Box 1700  
Houston, Texas 77001

Gentlemen:

This refers to the security inspection conducted by Mr. James Kelly of this office during the period April 8-12, 1985, of activities authorized by NRC Construction Permits CPPR-128 and CPPR-129 for South Texas Project, and to the discussion of our findings with Mr. J. G. Dewease and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included the current and proposed policies and practices of the Houston Lighting & Power personnel fitness for duty program, handling of reported quality concerns, security organization development, and coordination practices for the design and installation of the physical security systems. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material, with the exception of the report cover page which is an inspection summary, will not be placed in the Public Document Room.

Within the scope of the inspection, no violations or deviations were identified.
