ATTN: Stephen D. Hill, Research Director
729 Arapahoe Drive
Salt Lake City, Utah 84108

SUBJECT: NRC INSPECTION REPORT 030-06459/93-01

This refers to the routine, unannounced inspection conducted by Mr. Robert A. Brown of this office on February 4, 1993. The inspection included a review of activities authorized by Byproduct Material License No. 43-03238-01. At the conclusion of the inspection, the findings were discussed with members of your staff.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observation of activities in progress.

No violations or deviations were identified; therefore, no response to this letter is required.

The inspector noted that your use of licensed material is currently much less than that authorized on your license. Essentially only one laboratory is involved in using radioisotopes.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact the inspector identified above at (817) 860-8100.

Sincerely,

William L. Fisher

William L. Fisher, Chief
Nuclear Materials Licensing Section
