October 10, 1996

SUBJECT: NORTH ANNA UNIT 2 - INSERVICE INSPECTION PROGRAM RELIEF REQUESTS
NOS. NDE-23 THROUGH NDE-30. (TAC NOS. M95201 AND M95202)

Dear Mr. O'Hanlon:

The NRC staff, with technical assistance from our contractor, the Idaho National Engineering Laboratory (INEL), has reviewed and evaluated the information you provided in letters dated August 2, 1995, and September 1, 1995, related to the Second 10-Year Interval Inservice Inspection Program Requests for Relief Nos. NDE-23 through NDE-30 for North Anna Power Station, Unit 2.

Based on the information submitted, the staff adopts the contractor's conclusions and recommendations presented in the enclosed Technical Letter Report. The staff concluded that Code requirements contained in Requests for Relief Nos. NDE-23 through NDE-30 are impractical because of interferences and/or limited accessibility by other components. Replacement of the component or design modification would be necessary to perform the Code-required examinations that would result in a burden on the licensee. The licensee's proposed alternatives will provide adequate assurance of structural integrity. Therefore, the licensee's Requests for Relief Nos. NDE-23 through NDE-30 are granted pursuant to 10 CFR 50.55a(g)(6)(i). This relief granted and the alternatives imposed are authorized by law, will not endanger life, property, or common defense and security, and are otherwise in the public interest, giving due consideration to the burden upon the licensee that could result if the requirements were imposed.

This completes our efforts on this issue and we are, therefore, closing out Tac. Nos. M95201* and M95202.

Sincerely,
(Original Signed By)
Mark Reinhart, Acting Director
Project Directorate II-1
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
