- (2) W. G. Council letter to T. E. Murley, F0693A, dated March 28, 1985.

Dear Dr. Murley:

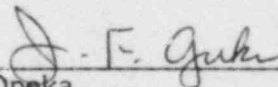

Millstone Nuclear Power Station, Unit No. 3
Reporting of Potential Significant Deficiencies
in Accordance with 10CFR50.55(e):
Westinghouse 7300 Process Control Cabinets (SD-69)

In a January 11, 1985 telephone conversation between your Mr. T. Rebelowski and our Mr. G. M. Olsen, Northeast Nuclear Energy Company (NNECO) reported a potential significant deficiency in the construction of Millstone Unit No. 3 in accordance with 10CFR50.55(e). The potential significant deficiency involves the Westinghouse 7300 process control cabinets.

In Reference (2), we informed you that we would provide an update on this matter by May 15, 1985. We are not able to provide further information at this time since Westinghouse is still investigating this particular configuration. We will provide the next report on SD-69 by July 18, 1985.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

J. F. Opeka
Senior Vice President
