Dr. Cecil O. Thomas, Chief
Standardization & Special Projects Branch
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: XN-NF-82-06(P), Revision 1, "Qualification of Exxon Nuclear Fuel
for Extended Burnup"

Ref.: Letter, G.F. Owsley (ENC) to J.R. Miller (NRC), dated March 11,
1982 (GFO:017:82)

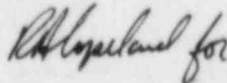

Dear Dr. Thomas:

Enclosed for your information and review is Exxon Nuclear's response to a follow-on question concerning the subject report. The question addressed how power transients are considered in the end-of-life fuel rod internal pressure calculations. It is our intent to place this letter and response as part of the accepted version of this report when that version is issued so that the response will be kept with the document.

Exxon Nuclear Company considers information contained in the attachment to be proprietary. In accordance with the Commission's Regulation 10 CFR 2.790(b), the Affidavit transmitted by the reference letter provides the necessary information to support the withholding of the attachment from public disclosure.

This letter and its enclosure do not constitute application for a new special project review and approval. Therefore, no application fee is required under the Commission's Regulation 10 CFR 170.12(f) and no additional payments are forwarded herewith.

Sincerely,

J.C. Chandler
