Received By	<i>[Signature]</i>

Re: License Number 34-13317-02

Gentlemen:

Please amend the above-referenced license to add Robert M. Levin, M. D., as an authorized user. Dr. Levin was previously authorized under License Number 34-01334-02, see attached copy. Dr. Levin should be authorized for Groups II and III, I-131 for the diagnosis of thyroid function and Xenon-133.

Also, please amend above-referenced license to authorize up to 600 mCi of Cesium-137 for the purpose of brachytherapy. The Cs-137 sources will be used under the supervision of Drs. Joseph Concannon, James Hughes, and Gerald Medwick. These physicians are presently listed as authorized users on NRC License Number 37-20758-01 and NRC License Number 37-01317-01. Radiation safety procedures are attached.

We have enclosed a check for \$120.00.

Finally, please send us a copy of Amendment Number Nine (9) to our license for our files.

Sincerely,

OHIO VALLEY HOSPITAL ASSOCIATION
