Re: Renewal of License No. 12-18913-01

Gentlemen:

The above referenced license expires on April 30, 1985 and we wish to continue to operate under our current license including Amendments Nos. 1 and 2. Our current program is described in the above documents in addition to our original application dated February 27, 1980. The original license is dated April 11, 1980 Amendment No. 1 is dated July 14, 1980, and Amendment No. 2 is dated July 6, 1982. We will continue to operate in accordance with those documents and applicable NRC regulations and license conditions.

I wish to advise that your license renewal packet was postmarked March 26, 1985 in Washington, D.C. and did not reach my desk until April 3, 1985 which precluded submitting this application more than 30 days before the expiration date. Therefore, we request that you expedite approval before April 30, 1985 as the soil density gage is in constant use.

Thank you very much.

Very truly yours,

NAPERVILLE EXCAVATING, Inc.
