Re: In the Matter of Commonwealth Edison Company
(Braidwood Nuclear Power Station, Units 1 and 2
Docket Nos. 50-456 and 50-457) CL

Gentlemen:

I am enclosing the affidavit of Alfred H. Getty, the System Planning Manager of Commonwealth Edison Company. Pursuant to the Licensing Board's order of April 17, 1985, this affidavit constitutes the Applicant's report, in connection with Neiner Contention 1, of its presently known and potential future plans for installing a 765kV transmission line associated with the Braidwood plant.

In conformance with the Board's order, counsel for Applicant gave copies of this affidavit to representatives of Neiner Farms and the NRC Staff on May 21, 1985, and discussed its contents with those parties. The parties discussed whether, on the basis of Applicant's report, the contention could be dismissed or deferred, either until a future NRC hearing when Applicant proposed

to install the line or until after approval of an operating license. The parties were unable to reach agreement on any such course of action.

The parties also discussed other means by which the contention might be settled by agreement and a further discussion will take place on that basis. Applicant files the report at this time in accordance with the Board's desire that it be filed by the end of May 1985.

Sincerely,

A handwritten signature in cursive script, appearing to read "Peter Thornton".
