

February 18, 1993

Docket no. 50-482

Mr. Bart D. Withers
President and Chief Executive Officer
Wolf Creek Nuclear Operating Corporation
Post Office Box 411
Burlington, Kansas 66829

Dear Mr. Withers.

SUBJECT: WOLF CREEK GENERATING STATION RADIAL PEAKING FACTOR LIMIT REPORT

Wolf Creek Generating Station Technical Specification 6.9.1.9 requires the submittal of the cycle specific Radial Peaking Factor Limit Report at least 60 days prior to each cycle initial criticality unless otherwise approved by the Commission by letter. The staff is currently reviewing the proposed Technical Specification amendment submitted by Mr. Robert Hagan's letter of October 28, 1992 which would delete this requirement. Since the staff's review may not be completed 60 days prior to the Cycle 7 initial criticality, this letter provides the Commission's approval for Wolf Creek Nuclear Operating Corporation to not submit the Radial Peaking Factor Limit Report. The reporting requirements associated with Cycle 7 will be addressed by a separate letter following completion of the staff review of the proposed Technical Specification revisions.

Sincerely,

William D. Reckley

for
Suzanne C. Black, Director
Project Directorate IV-2
Division of Reactor Projects III/IV/V
Office of Nuclear Reactor Regulation
