Re: NRC radioactive materials license renewal application 12-18742-01

Gentlemen:

Enclosed please find three copies of our radioactive materials license renewal application. Our hospital check in the amount of \$580 is enclosed to cover the processing fees.

We have also enclosed a copy of the close-out radiation survey and wipe test results of our old nuclear medicine department. The department was relocated earlier this month; however the survey was performed prior to releasing the area for unrestricted uses.

Should your office require additional information to complete the review of the renewal application, you may contact Standard Nuclear Consultants directly at: (312) 344-7308. We have retained the services of this company to act on our behalf for this licensing project. Thank you.

Sincerely,

*Timothy C. Wadman*
