Dear Mr. Selon,

I am writing out of a concern for the inadequacy of the NRC's response to the questions of degradation at Vermont Yankee. We need a thorough, systematic and public investigation of the safety components of an aging system which needs careful monitoring.

The public needs to be informed of the facts behind your opinions and we need to know more about your criteria.

Please help us all become better informed concerning this issue which is of vital importance to all of us in this area. Thank you.

Sincerely, Anne Jones
