Re: Request to amend NRC License
number 12-24317-01 for termination

Dear Mr. Mallett:

In response to your letter dated February 21, 1985, we have requested the personnel of Nuclear Diagnostics, Inc., and Radiation Protection Consultants, Ltd., to perform the close-out surveys for our license termination. These individuals have informed us that the close-out surveys will be performed on or about the last two weeks of May, 1985.

Upon the completion of the close-out survey, Nuclear Diagnostics will submit the following:

1. Description of surveys;
2. Description of instruments used and methods used to covert wipe test results to disintegrations per minute per unit area.
3. Results of all tests.

We will forward this information in duplicate to your attention.

If you have any questions, please contact the undersigned.
Thank you for your cooperation in this matter.

Sincerely,

SHELBY MEMORIAL HOSPITAL

Garland Strohl,
Administrator
