Memorandum to File

Deemed to be

License No. 27-15364-01

Inspection on December 10, 1980 was conducted on request of licensee and in response to inquiries about activities conducted by Deemed to be from reports in area.

Licensee revealed during course of inspection that he had experienced labor problems during month of November 1980 resulting from an attempt by certain employees to organize Union at the facility.

Licensee stated that Supervisory Inspection had initiated action to organize Union representation for employees. He stated that NLRB procedures had been followed and the vote by employees was not to be represented by Union. There resulted in a strike by some employees who were replaced and have not been rehired. He further stated that incidents of vandalism to cars and property had occurred and bitter feelings still exist with former employees. This may result in additional allegations against the company.
