

JUL 16 1985

Mrs. Eleanor Busick, Acting Director
Office of Nuclear Export/Import Control
Bureau of Oceans & International
Environmental & Scientific Affairs
U.S. Department of State
Washington, D.C. 20520

Dear Mrs. Busick:

This refers to our letter of June 17, 1985 to Carlton Stoiber in which we transmitted for review Edlow International Company's license application XU08611 for the export of 2,500,000 kilograms of natural uranium to certain countries for conversion, enrichment, and fabrication into fuel assemblies for ultimate use in light-water power reactors located in the U.S., EURATOM, Spain, Sweden, and Switzerland.

With regard to this request, DOE recently has informally advised NRC that based on previous discussions with the embassies of Canada, Switzerland, Sweden, and Spain, none of these countries is prepared to provide the required generic written assurances to cover the proposed export of source material. In view of this, Edlow has submitted the enclosed revised license application XU08611 dated July 9, 1985 to replace its earlier application. This new application removes Eldorado, Canada; Asea-Atom, Sweden; and ENUSA, Spain as intermediate consignees and Sweden, Switzerland, and Spain as possible countries of ultimate destination. As a result, license application XU08611 now will cover only exports to intermediate consignees located in EURATOM for ultimate use in light-water power reactors located in the U.S. and EURATOM.

We would appreciate your views on the revised application in accordance with established procedures as to whether the proposed export meets the applicable criteria in the Atomic Energy Act as amended by the Nuclear Non-Proliferation Act of 1978. Please note the application involves the enrichment of U.S.-supplied material.

Sincerely,

Original signed by: Marvin R. Peterson

Marvin R. Peterson, Acting Assistant Director
Export/Import and International Safeguards
