

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

November 14, 1984

NOTE TO: R. E. Browning  
FROM: John G. Davis  
SUBJECT: COMMISSION PAPER ON PROGRESS OF AMFM PANEL

The paper as received by me is untimely. It looks forward to a meeting on 11/13-14. It was received by me on 11/14. Hence, by the time the paper gets to the Commission the 11/13-14 meeting will have transpired and the information in the paper will be dated.

In general the time of the paper represents a more positive position by the Panel that I would have anticipated from discussions I have had. An example of this tone appears on the second (unnumbered) page of the report "... the Panel plans to recommend ..." I had thought the Panel (as a body, not individuals) was more tentative than the Commission paper suggests.

Also, on the second page of the paper "improvements" are discussed. Did the Panel characterize these as "improvements" or "changes."

Lets discuss promptly.

  
John G. Davis

Enclosure:  
As stated
