January 31, 1983
Joppa Plant

United States Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137
Attn: Mike McCann

Dear Sir:

Under Control Number 07373 we have applied for an ammendment to our Materials License 12-10988-01 to include a Texas nuclear model 9200 series X-ray fluorisensor analyzer.

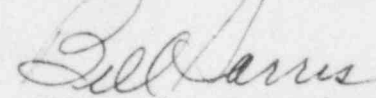

This unit will be utilized at our facility located at Massac County Road, 3 miles Northwest of Joppa, Illinois. It will be placed in an office of our laboratory located adjacent to the control room of our facility which is on the second floor of our mill building. Our plant is operated on a 24 hour daily basis from the control room. The process requires regular testing of materials and mix which is conducted in the laboratory facilities.

Our Production Superintendent is Mr. Donald Smith. He is a graduate of a training course in radiation measurement and safety which was conducted at the Joppa Plant in 1979 by the Ohmart Corp.

Necessary maintenance or repairs would be handled by the manufacturer. Should it become necessary to dispose of the equipment it will be returned to the manufacturer or transferred to someone licensed to receive such equipment as outlined in our license.

Yours truly,

MISSOURI PORTLAND CEMENT CO.

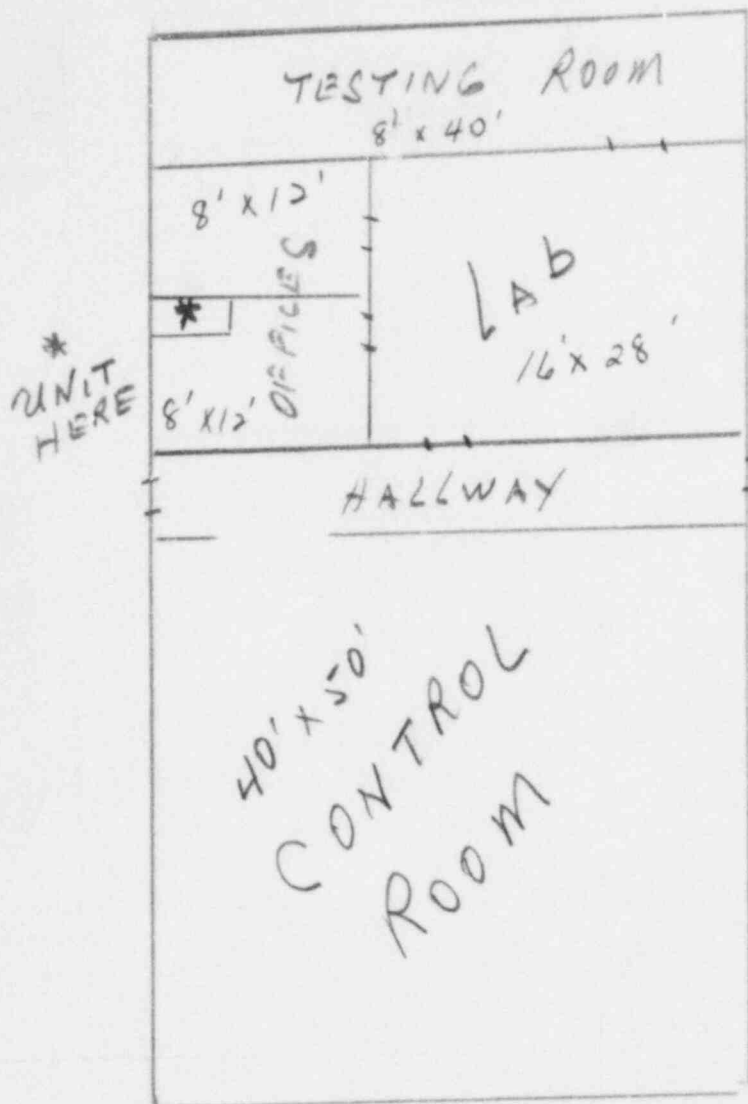

Bill Harris, Supervisor
