## INITIAL MESSAGE

Several weeks ago a Mr. Shuyler Mitchell 206-747-0222 came in with an unsolicited proposal to Stettin, Mosley and myself to perform a low-cost interference analysis of piping, structures, cable trays etc at a nuclear plant to identify probable areas which were field-changed and thereby likely to show up as an as-built seismic analysis problem. We need a work statement to obtain bids for small purchase (<10K). I have discussed with Howard Rose. Please see me.

1. He will send examples of work statement and evaluation criteria

A-22

BOB LAGRANGE, TELE, 4/11/80

1. Re computer identification of piping interferences, he suggests that we look at Indian Point 2.
2. Construction Systems Associates (Atlanta), McAuto Systems, and A.D. Little probably do this work.
